

XM Satellite Radio is one of the best things to come out of a set of speakers especially when traveling by car or motorcycle. With the addition of Traffic and Weather it is the best option I could have added to my motorcycle and my car.

Traveling from town to town and trying to get a traffic or weather report and not knowing where to tune or only getting DJ's that seem to be on the air just to hear themselves talk (like Ryan Seacrest - American Idol) is not why I turn on the radio.

I pay for these services and therefore feel I should get all that they are offering if I didn't feel this way it would be up to me to cancel my subscription not anyone else's

I Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

Thank's for your time
